

Presentation1 Script

Héllö everyone. ↓ //

My name is **Héizo Nákai**, / and my presenter number is **55**. ↓ //

Fírst, / I'd like to introduce **mysélf**. ↓ //

I'm from **Shíga Prèfecture**, / and I lived there until I graduated from **hígh school**. ↓ //

Shíga is famous for **Làke Bìwa**, / the largest lake in **Japàn**. ↓ //

I grew up in a **cálm envíronment** / surrounded by **náture**. ↓ //

After **hígh school**, / I moved to **Tókyo** for university. ↓ //

During my undergraduate years, / I became interested in **tèchnology**, / especially **vírtual réality** and **húman-compúter interaction**. ↓ //

Nów, / I'm a first-year **máster's stúdent** here at **NAIST**. ↓ //

Nèxt, / I'd like to talk about my **reséarch field**. ↓ //

I belong to the **Compúting Archítecture Laboratory**, / and my research field is **com-púting archítecture**. ↓ //

At first, / I was mainly interested in **vírtual réality**. ↓ //

Howèver, / as I learned more about **VR systems**, ↘ / I realized that **hígh-quáality VR** requires a lot of **computátion** and **ènergy**. ↓ //

For example, / VR needs **real-time ímage processing**, / **low látency**, / and **hígh perfórmance**. ↓ //

This made me interested in the **hårdware** and **sýstem-level technólogies** / behind these applications. ↓ //

I think **compúting archítecture** is interesting / because it connects **hårdware** and **sóftware**. ↓ //

By improving **compúter archítecture**, ↘ / we can make advanced applications **fáster** / and more **ènergy effícient**. ↓ //

In the **fùture**, / I would like to become an **enginèer** or **resèarcher** / who understands both **hàrdware** and **sòftware**. ↓ //

Thank you for **listening**. ↓ //

Delivery II: Speed, pronunciation, & stress p.2 (日本語訳)

1. どうすれば、話すスピードが速くなりすぎるのを防げるか？

- 緊張をコントロールする：リハーサルとイメージトレーニングを行う
- 専門用語や重要なフレーズは、よりゆっくり・はっきり話す

2. どのような場面で間を取るべきか？

- 短い間：節と節、文と文のあいだの文法的な切れ目
- 長い間：重要なポイントの後、修辞疑問文の後、話の段階の切り替え時、スライドを切り替える前

3. 発表の中で、どの語の発音に特に注意すべきか？

- キーワード：繰り返し出てくる語、主要ポイントに関連する専門語
